Elektros, Inc. (OTC: ELEK)

NEXT REALM AI ADVISORY

AI Energy & Data Center Growth Strategy

A Low-CapEx Operational Roadmap Recommended by Next Realm AI to Accelerate Commercialization and Re-Rate Public Market Value

Capital Allocation ELEK Strategic Pivot

 Pragmatic Resource Allocation Strategy

 Low CapEx Model

 Immediate AI Software Market Entry

LONG-TERM OPTION

Lithium Mining Asset (Sierra Leone Claims)

Retain Sierra Leone mineral rights as a long-term speculative exploration asset, avoiding immediate high-CapEx dilutive capital calls and exposure to battery metal commodity price volatility.

NEAR-TERM GROWTH ENGINE

AI Energy Infrastructure (Smart Energy & Optimization)

Next Realm AI recommends pivoting primary capital and executive focus to lightweight AI data center energy software, agentic workflows for hotel and real estate, and smart grid optimization to yield near-term revenues.

Core AI Operational Pillars **3 Growth Drivers**

Agentic AI & Efficient Code

Deploying autonomous Agentic AI workflows and energy-efficient LLM code structures to reduce compute cycles, lowering thermal load and power cost for data centers and real estate portfolios.

Small-Scale Data Center Focus

Targeting edge and small-scale data centers with software-driven load balancing and power monitoring to bypass peak grid tariffs faced by hyperscalers.

Smart Enterprise & IP Licensing

Commercializing patented EV multi-port charging tech (U.S. Patent No. 12,522,100 B1) alongside hospitality and commercial real estate energy reduction solutions.

Ecosystem & Talent Acceleration **Execution Velocity**

Ivy League Talent Pipeline

Collaborating with elite Ivy League AI and Energy Sustainability developer networks to deploy driven talent for rapid, low-cost research and software prototyping.

Enterprise Partner Alliances

Leveraging Next Realm AI's position in premier enterprise partner ecosystems (including IBM and Nvidia) to offer pre-validated AI energy solutions.

Capital-Light Scaling

Executing with minimal monthly operational burn rather than multi-million dollar capital-intensive industrial extraction CapEx.

Federal Grants & Contracts

CAGE Code Registration

Submitting SAM.gov registration to obtain a Department of Defense (DoD) CAGE Code, establishing legal and operational eligibility for U.S. federal contracts.

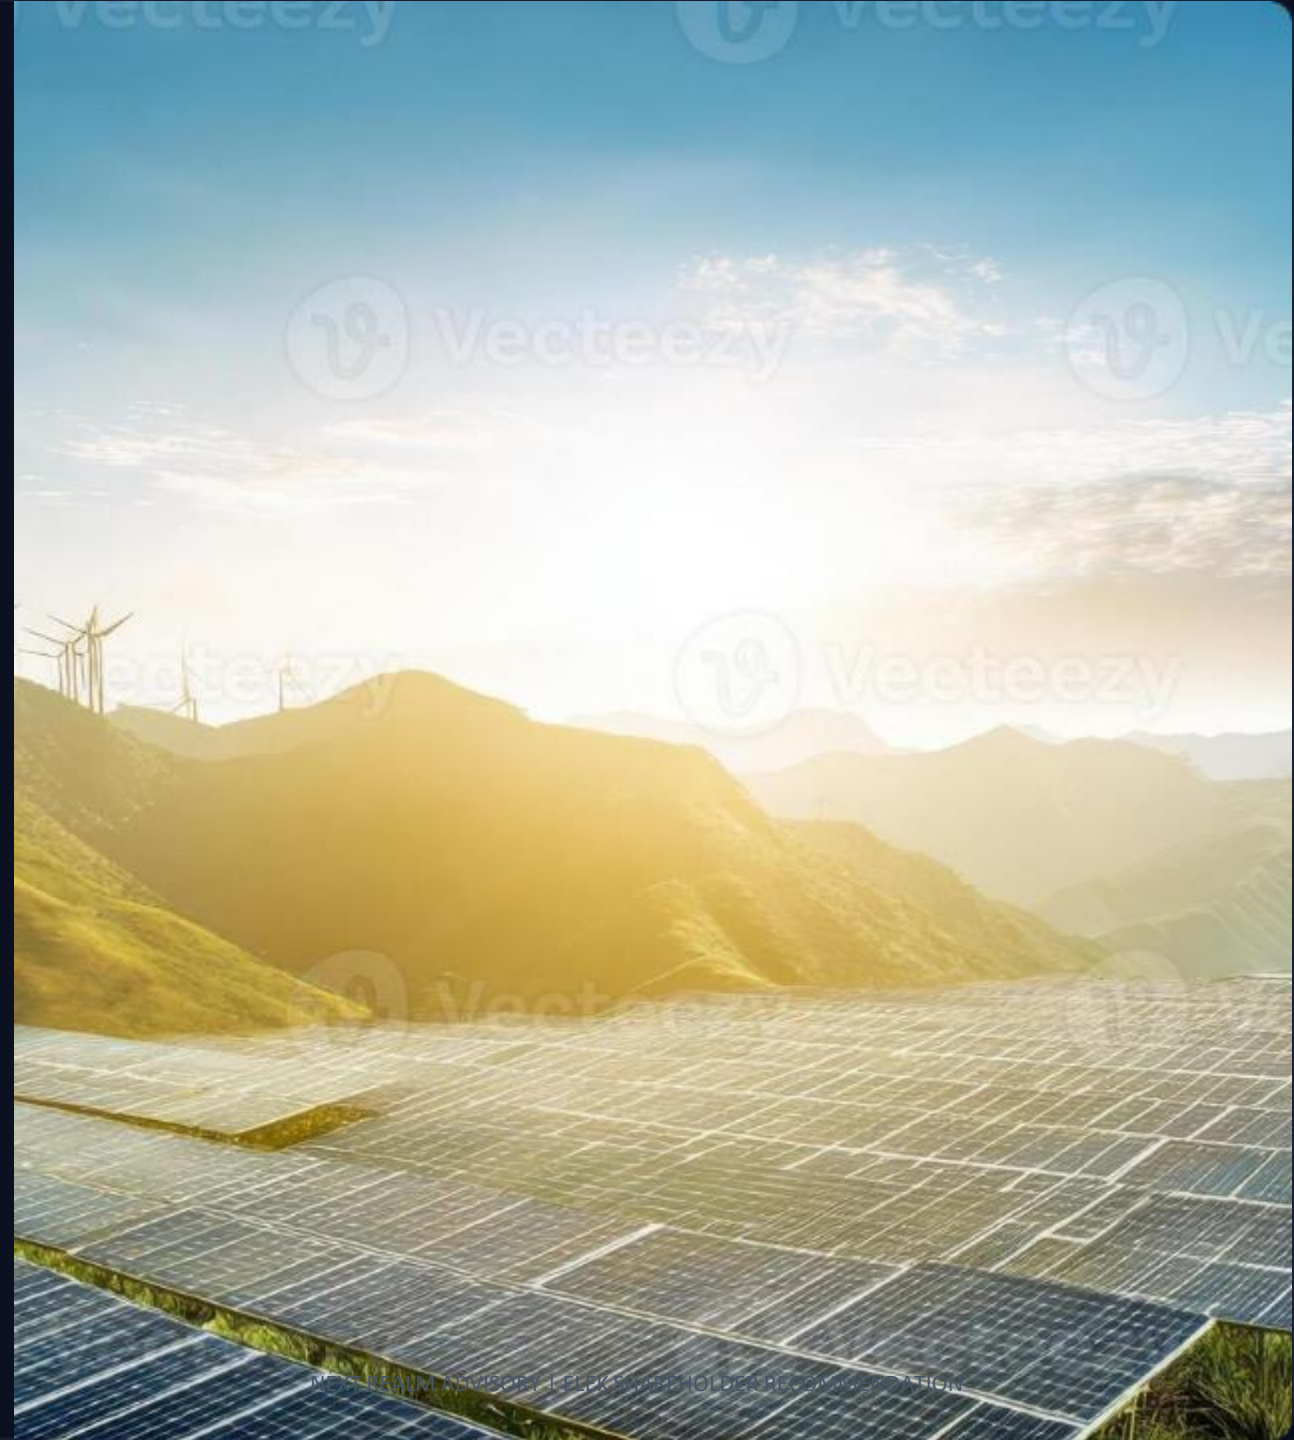

Non-Dilutive Energy Grants

Targeting Department of Energy (DoE) and ARPA-E grant programs focused on data center power reduction, microgrid resiliency, and clean energy software.

Defense & Intelligence Compute

Positioning specialized AI load-balancing software for military tactical edge data centers and high-density defense compute facilities.

Near-Term Execution & Governance Action Plan

Immediate Revenue Milestones

Roll out Agentic AI energy efficiency solutions for commercial real estate and hospitality clients. Offer software audits for edge data center operators seeking quick electricity cost reductions while pursuing government grant opportunities.

Strategic Governance & Market Re-Rating

Establishes a documented, public advisory plan by Next Realm AI for Elektros. Demonstrates disciplined fiduciary leadership to position ELEK for public market re-rating.
